OVERVIEW

My name is Martin. I'm 32 and while I have completed my law studies long time ago and I have been working as a lawyer for the last 10 years, in 2021 I realized that I wanted a big change in my life.

Targeting that direction I completed a six month "Full Stack Developer" where I started using Node.js, Git, HTML5, CSS, React.js, API REST, SQL and TailwindCSS. Having finished that course I strengthened my front end skills,
focusing in React.js framework.

Nowadays, I'm eager to learn and very excited about winning a chance to enjoy my first IT professional experience, while I keep studying and carrying on some personal projects (https://github.com/mlabato).
